PROFILE

Computer Science graduate with a strong passion for game development, specializing in Unity 3D. Skilled in designing and developing interactive games using C#, with experience in implementing game mechanics, UI systems, and asset integration. Proficient in object-oriented programming, version control, and optimizing game performance for mobile and PC platforms. Eager to contribute to a creative and collaborative game development team, bringing innovative ideas from concept to final build.

PERSONAL PROJECTS

Checkers - Online Multiplayer Board Game | Personal Project | Unity 3D | Android | In Final Testing
Developed an online and offline multiplayer strategy game featuring AI opponents, multiple difficulty levels, custom movement and capture mechanics, and real-time multiplayer synchronization using Photon PUN 2.

Block Puzzle Game | Freelance Client Project | Unity 2D | Android
Developed a complete 2D block puzzle game featuring grid-based placement, row and column detection, and automatic line-clearing mechanics.

Low-Poly Car Stunt Game (Client Project) - Freelance Project | Unity 3D | Android
Developed a 3D platform-based car stunt game featuring vehicle controls, coin collection, checkpoints, and challenging platform navigation.

Master Test- Quiz Game - Personal Project - Unity 2D | Android
Developed a quiz game featuring subject-based questions, timed gameplay, scoring, and result statistics.

Rotating Cubes | Freelance Project | Unity 3D | Android
Developed a turn-based strategy game featuring AI movement, rerouting paths, cube interactions, and obstacle placement.

Battle Zone Master | Final Year Project | Unity 3D
Developed a multiplayer team deathmatch shooter with customized weapons, maps, and gameplay mechanics using MFPS.

EDUCATION

BS Computer Science 2020 - 2024
University of Loralai, Balochistan
